## Group by property

It's possible to group the item by a property of type "checkbox" or "dropdown list".

## How to install « Layout - Group By»?

<https://github.com/casewise/cpm/wiki>  
then Restart Evolve Designer

## How to configure "Layout - Group By"

### Configuration in Evolve Designer

## In an index page - Group by alphabet\*\*

- Add an index page
- Switch to **Layout Group By**
- If you wish to apply the "**Accordion**" to the top level, you need first to add "**Accordion**" behavior and then Switch the layout to **Layout Group By**
- Tick the option "**Group By Alphabet**"

The screenshot shows the Casewise Evolve Designer interface. The top navigation bar includes 'Home', 'Dynamic Deployment', and 'Static Deployment'. Below this are icons for 'Server Configuration', 'Add/Remove Site', 'Diagram Templates', 'Theme & Pictures', 'Deploy Site', and 'Save & Deploy Site'. The main area is divided into 'Layouts' and 'Options [cwWebDesignerTreeNodeLayout] - Layout Group By'.

The 'Layouts' tree on the left shows a hierarchy of index pages. The 'Layout Group By' option is selected, and the 'Options' panel on the right shows the configuration for this layout.

Node Name	Layout Group By
Display Object Hyperlink	<input checked="" type="checkbox"/>
Javascript Class Name	cwGroupBy
Layout Name	groupby
Layout ID	
Custom Display String	{name} <i class="fa fa-flag fa-status-{status_abbreviation}"></i>
Group by Alphabet	<input checked="" type="checkbox"/>
Or Group by Property	
Both levels are expandable	<input type="checkbox"/>

## In an index page - Group by Property\*\*

- Add an index page
- Switch to **Layout Group By**
- If you wish to apply the "**Accordion**" to the top level, you need first to add "**Accordion**" behavior and then Switch the layout to **Layout Group By**
- Keep the option "**Group By Alphabet**" unchecked
- Specify the **Property Type Script Name** in "Or Group By Property"
- Make sure that the property is selected in "Selected Properties", it will make the property data available in JSON data.
- The fact of using "Layout Group By", it wills the items organized in 2 levels. If you wish to make both of them expandable, check the option "**Both levels are expandable**"
